From a team of international experts comes this analysis of the role, nature and effects of modern business travel. Issues addressed include the relationships between airlines and business travellers, the role of mobility in business, and the opportunities and challenges created by mobile workforces. The study combines theoretical advances with comprehensive analysis, and will provoke debate across the social sciences on the nature, organization and space of work in the twenty-first century.

Contents:
Foreword: business travel in the global economy, Brian Graham; International business travel and the global economy: setting the context, Jonathan V. Beaverstock, Ben Derudder, James Faulconbridge and Frank Witlox; Part 1 Geographies and Modes of Business Travel: A people set apart: the spatial development of airline business class services, John T.
