

CITING AND REFERENCING: BRITISH STANDARD NUMERIC

What is citation?

Citation is the means by which you tell a reader the sources – books, journals, Web pages that you have referred to in your work.

Why it is important to reference the work of other people?

It is important to cite sources accurately for four main reasons; giving credit to other authors, showing that you have read widely, letting others trace the works you have read and avoiding plagiarism.

Examples in this guide

This guide will show you how to cite a wide range of resources using British Standard Numeric:

Books including e-books	Newspaper articles
Chapters from books	Standards
Journal articles	Patents
Web sites	Images

Citing references in your text – also known as “In text citations”

When using the Numeric style, information resources are referred to in the text of your work by numerals in brackets, in the order in which they are first cited:

The notion of an invisible collage has been explored in the sciences (1)

Subsequent citations of a particular resource receive the same number as the first. If parts of a resource are cited, page numbers, etc., may be given after the numerals:

Its absence among historians is noted by Stieg (2 p.556)

The references to the information resources should be arranged in their numerical order in a numbered list.

Citing sources in your reference list

For each type of material you cite you will need specific details in your reference list. Remember to stay consistent when referencing each item.

- (4) DAVIES, S. The Professor, Agnes Grey and Wuthering Heights. In: H. GLEN, ed. *The Brontes*. Cambridge: Cambridge University Press, 2002, pp. 75.
- (5) HOLT, J. and S. PERRY. Modelling enterprise architectures [online]. Stevenage: IET, 2010 [viewed 5 Sep 2018]. Available from: <http://dx.doi.org/10.1049/PBPC008E>

What is the difference between a reference list and a bibliography?

This will vary from department to department. For some departments, a reference list contains all the citations from your work, and a bibliography contains all the items you have read irrespective of whether they have been cited or not. Other departments may use different definitions so please check with your tutor or department.

Note: If you have accessed a resource electronically, or used a mobile device/e-book reader, you may need to add information to the citation. Please see your Departmental handbook or ask your tutor for advice.
