

Compare the programmes

Academic Year: 2020–2021

The programmes are modular-based. Use this page to find out the module composition of the two programmes: **Water Management for Development (WMFD)** and **Water Engineering for Development (WEFD)** and see how they compare. The table refers to both the Loughborough-based and the distance learning programmes. For further details of the modules and their availability, visit: <https://www.lboro.ac.uk/research/wedc/programmes/module-specifications/> where you will also note that there are a number of common sessions/units between modules for both the WMFD and WEFD programmes.

Module title	WMFD	WEFD
SEMESTER 1 (October – January)		
Flood Modelling and Management (FMM)	X	✓
Management and Operation of Water Utilities (MOWU)	✓	X
Management of Village Water Services (MVWS)	✓	X
Research Methods (RM)	✓	✓
