

## CHROMEBOOK – WIFI SETUP INSTRUCTIONS

1. Connect to setup-Wi-Fi
2. Open Google Chrome – go to <https://cloudpath.lboro.ac.uk>
3. Enter your Loughborough credentials, and accept the AUP
4. If you have previously connected to eduroam you can review your devices and delete certificates which are not in use
5. If you are using an existing device, select the device name from the list and click 'continue'.
6. If this is a new device, select 'This is an additional device' fill in the Name for the device and click "Continue".
7. Go to Downloads Folder
8. Cloudpath will detect the device as Chrome OS,
9. Click Step 1 to download the Network File – DO NOT OPEN THIS FILE

### 10. Follow the steps outlined in Step 2:

Open a new tab in the browser

Type – `Chrome://net-internals/#chromeos`

Under Import ONC File, click Choose File

A pop-up window will open, select the downloaded eduroam.onc file, and click Open. – wait a few seconds (nothing will pop-up if it is successful)

After a minute, try to connect to eduroam, by going into your device's Wi-Fi settings and selecting eduroam.

If the certificate was successfully downloaded, the device will connect to eduroam.
