

Doctoral Training Centre Joint Conference Tissue Engineering and Regenerative Medicine

**Keele University Medical School
Friday 20th of July 20**

Keele University will host this year's annual Joint EPSRC Centre for Tissue Engineering and Regenerative Medicine conference. This important event will bring together exciting research from a number of key universities, providing a forum for discussion to drive all areas related to regenerative medicine. The meeting particularly aims to provide opportunities for postgraduate students to present their work and discuss its significance within this interdisciplinary arena.

Keynote Speaker: Todd C. McDevitt, Georgia Institute of Technology

The day event will be held in the Medical School with dinner and poster session in the neighbouring Sustainability Hub.

Interest from industry to attend and sponsor the event is welcomed. Further info is available at
