VISION STANDARDS

Comprehensive Survey of Vision Standards for Driving, Vision Assessment and Appeal Procedures in Canada and the United States
E. J. Casson and L. Racette

Sensitivity and specificity of vision tests for predicting driving performance
K. E. Higgins and J.M. Wood

The effects of minimal field defects upon on-road driving performance
N. Jolly, N. Moss, S. Silveira, M. Benson and S. Blanchette

AGE AND VISION

The effect of age on visual complaints for drivers
S.P. Taylor

Effects of vision and age on driving performance as measured under closed and open road conditions
J.M. Wood

Effects of Age and Illumination on Driving Performance
D. Owens, J. Wood, D. Whittam and M. Woolf

The Effect of Age and Defective Vision upon Performance on an Internet Dynamic Visual Attention Test
N. Phelps, M. Dunne and B. Hyland

VISUAL FIELD DEFECTS

The effect of compensatory viewing strategies on driving performance in subjects with visual field defects: preliminary results

Homonymous Hemianopic Visual Field Defects and Driving
G. Munton

Quadrantanopia can shift to Hemianopia with shift of task-demands

Evaluation of the effectiveness of a hemi-neglect rehabilitation program and generalization to driving: a case study
Does Photometry help the Designer?
New research offers a different approach to photometry based on performance

TIME-TO-CONTACT

Speed and environmental characteristics in time-to-collision estimates and braking initiation
V. Cavallo

Approaching object occlusion as a salient source of time-to-contact information
M.P. Manser and P.A. Hancock

ECOLOGICAL VALIDITY

Tau-dot or not? Visual information and control of car following
J.A. Groeger and S.J. Brady

The ecological validity paradox in visual perception research
M.P. Manser and P.A. Hancock

Distance perception in driver-side and passenger-side convex rearview mirrors: Objects in mirror are more complicated than they appear
M.J. Flannagan, M. Sivak, J. Schumann, S. Kojima, & E.C. Traube

VISUAL SEARCH

Eye movements during the inspection of dynamic traffic scenes
G. Underwood, H. Dobson, P. Chapman and D. Crundall

Attention and eye-movements while driving: Effects of verbal versus spatial-imagery and comprehension versus response production tasks
M. A. Recarte, L. M. Nunes and A. Conchillo

Improvements to the Drivers’ Field of View from Large Road Vehicles
R Tait, D Southall, M Porter & M Freer

Rear-view mirror glances during extended truck-simulator driving
J.A. Stern, T.A. Ranney, L.A. Simmons, Z. Boulos and M.M. Macchi

An attentive look at driver’s fixation durations
P. Unema, S. Dornhoefer, S. Steudel and B. Velichkovsky

Eye Tracking: A Promising and Challenging Technology for Monitoring Operator Vigilance
T.W. Dukes
Visual attentional demand requirement in tasks related to mobile machine driving: preliminary results of an eye movement analysis
F. Hella, O. Laya, J.F. Schouller and P. Fontaine

Problems of visual attention in using automobile navigation system: The before and after effects
T. Miura, K. Shinohara & K. Kanda

NIGHT DRIVING

Reaction times as an index of visual conspicuity at night
S. Plainis, I.J. Murray, K. Chauhan, W.N. Charman

The Effect of Darkness and Rain on Motorway Driver Behaviour
M. Brackstone, N. Law, and M. McDonald

Distance Estimation during Night Driving
C. Castro, F.J. Martos, C. Martínez, F. Tornay and P.G.Fernandez

Nighttime conspicuity of pedestrians in urban environments
G. D. Jenssen, T. Moen and B. Brekke

DRIVER'S VISION AND VISION CONTROL

Modelling driver's decision and control behaviour on country roads
E R Boer & E C Hildreth

The Role of Expertise in High Speed Curve Negotiation: An Entry Phase Analysis
S. D. Rogers and E. E. Kadar

Visual demand of driving curves as determined by visual occlusion
O Tsimhoni and P.A. Green

The use of optical flow and splay angle in steering a central path
A. Chatziastros, G. M. Wallis & H. H. Bülthoff

Steering control and landmarks
A. Saidpour and G. J. Andersen

Road texture and road scenery are involved in the visual anticipation of a collision
C. Berthelon, D. Mestre and C. Nachtergaële

Discrimination in the peripheral field while hazard spotting

Reaction time while driving with an insufficient headway
Y Matsuki, K Shidoji, and K Matsunaga
Intersection accidents in rice fields - possible causes and a countermeasure  
N Uchida, D de Waard, K Fujita, K Brookhuis and T Katayama

Speed estimation in various traffic scenarios: open road and closed track  
A. Conchillo, L. Nunes, M.A. Recarte and T. Ruiz

Qualification of an experimentation centre to test visibility conditions in fog  
M. Colomb, L. Sérézat, G. Legoueix, J.J. Boreux

Visual orientation in traffic and driver training in Switzerland  
A. S. Cohen

ROAD SIGNS

Dynamic evaluation of pre-entry HOV signage using a virtual environments driving simulator  
R.R. Mourant and B.K. Jaeger

The Effects of Semantic Priming and Repetition Priming on Traffic Sign Recognition  
C. Castro, T. Horberry and A.G. Gale  
1 Faculty of Psychology, University of Granada, Spain

EVALUATION OF IN-VEHICLE TASK DEMANDS

Initial Development of a Computer Program for Assessment and Evaluation of In-Vehicle Task Visual and Manual Demands  
W. W. Wierwille

Development of a model and computer program for assessment and evaluation of task demands associated with complex in-vehicle information systems  
R. Hanowski, W. Wierwille, T. Dingus, J. Hankey & M. Moyer

Evaluation of the attentional demand of controls: a computerised tool kit  
B. Färber and M. Müller

VISUAL INTERFACES

A driver vision support system using a head-down virtual image display - results of driving simulator-based human factors trials  
P. Barham, L. Andreone and J. Eschler

Driver Responses to Imperfect Collision Warning Cues  
M. Maltz, I. Aminov, S. Aharonov & D. Shinar
The effectiveness of multi-modality display in advanced traveller information systems
Y-C. Liu and M-S. Chen

Optimising vehicle control locations
S. Lomas, J. May & A.G. Gale

ATTENTIONAL DEMANDS

Visual load induced by in-car office applications – some thoughts at an early stage
P. Roessger

The Value of Driver Assistance Systems - Results of an Expert Evaluation
B. Färber & B. Färber

Measuring drowsiness and impairment in car driving
W. van Winsum

The effect of performing a cognitive task on detection thresholds; eccentricity and task-difficulty effects
S. Plainis, K. Chauhan, I. Murray & W. Charman

The effect of map orientation and landmarks on visual attention while using an in-vehicle navigation system
W. Albert & A. Liu

DRIVER SUPPORT

The effects of vision enhancement on driver behaviour
N. Stanton and M. Pinto

Look - no hands! Potential effects of future vehicle automation on driver attention
M.S. Young and N.A. Stanton

A new approach to simulated traffic tests of visual field defects
S. Dahlstedt

A technique for on-road assessment of road sign visibility distances
K. Jones, J. Wood, M. Woolf and B. Bentley
