Preface v

Driver’s vision

Psychophysical estimation of aging on certain motion perception tasks: preliminary results 3
A. Raghuram, V. Lakshminarayanan and R. Khanna

Entoptic straylight measurement using the direct compensation method in relation to driver licensing application 11
T. van den Berg and L. van Rijn

Relationship between the useful visual field and event related potential P300 in driving an automobile 20
K. Yamanaka, H. Nakayasu and K. Maeda

Assessment of visual performance – effects of corneal refractive surgery 31
C. Chisholm, A. Evans, J. Harlow and J. Barbur

Mesopic visual search performance can be predicted using a new mesopic contrast metric 40
H. Walkey, J. Harlow and J. Barbur

Impairment of driver vision by veiling glare from dashboard reflections 49
J. Phillips, C. Musson and J. Huang

Influence of adaptive front-lighting system on glare perceived by oncoming drivers 56
M. Sekine, J. Mashiko, T. Okada and K. Morita

Driver performance 65

Evaluation of driving performance and possible criteria to design a performance feedback: a driving simulator study 67
T. Altmueller, D. Manstetten, M. Rimini-Doering, U. Ladstaetter and W. Wolf

Driver eye-scanning behaviour during monotonous highway driving 76
P. Simon, J-C. Popieul, P. Loslever, R. Leroux and D. Sonnerat

Blink parameter as indicators of driver’s sleepiness – possibilities and limitations 85
N. Galley, R. Schleicher and L. Galley

Driver performance evaluation: Considerations underlying selection and design of routes 93
Driver support systems

Eye movement identification within dynamic environment
B. Reimer and M. Sodhi

Safety implications of driver dual-task performance
F. Lai and O. Carsten

Safety of in-vehicle displays of automobiles: effect of mounting Position differences
K. Morita, M. Sekine, J. Mashiko and T. Okada

Using manual and speech-based interfaces while driving: the impact on visual behavior and driving performance
J. Harbluk, T. Ranney, Y. Noy, P. Trbovich and M. Eizenman

The eye of the beholder: cellular communication causes in attention blindness behind the wheel
D. Strayer, F. Drews, and W. Johnston

Vehicle and environmental visibility

Visibility of trailers: model predictions and field test
J. Alferdinck, D. Hoedemaeker, R. Brouwer

Eye movement and useful field of view in the operations of an excavator
T. Nakamura, K. Fukaya and S. Mannen

Characteristics of emergency and routine stopping behaviour in simulation studies
J. Bloomfield, K. Harder, and B. Chihak

The effect of fog on headway control
V. Cavallo and E. Beaudoin

Study of a method of scale reduction to test sign legibility in fog
J. Doré, M. Colomb, V. Cavallo, and J.J. Boreux

Available visual information on corners having high accident rates in Montevideo City
R. Jimenez-Riego, A Maiche Marini and S Estaun

Road environment

Repetition and semantic priming with traffic signs: effects of interstimulus interval
S. Cloete, T. Horberry and G. Wallis

Inferring from signs expressing obligation and prohibition
F. Torray, C. Castro and Moreno-Rios

The categorisation of roads by drivers and non-drivers
J. Underwood, G. Dillon and B. Farnsworth

Anticipatory gaze patterns before steering into lane on a
straight road
S. Rogers and E. Kadar

The effect of increasing the saliency of rural intersections on driving behavior
238
K A. Harder, J. Bloomfield and B.J.Chihak

Driving behaviour
247

Car following using visual parameters: real world driving
249
C. Sauer, G. Andersen and A. Saidpour

Cybernetics of car-following: A reality check for different driving simulators
257
E.R. Boer

Optical flow for cars overtaking monitor: the rear mirror blind spot problem
267
J. Díaz, E. Ros, S. Mota, G. Botella, A. Cañas and S. Sabatini

Motion driven segmentation scheme for car overtaking sequences
275
S. Mota, E. Ros, J. Díaz, G. Botella, F. Vargas-Martín and A. Prieto

The influence of lateral visibility in road geometric design
283
A. García and J. González

A model of the sequence of driver eye fixations derived from systems theory
292
A.S. Cohen, R. Hirsig, and N. Schöbi-Müller

Driver experience
301

Perceptual narrowing and driving experience: implications for remembering the scene
303
G. Underwood, Z. Berger, P. Chapman and D. Crundall

Evaluation of the TRAINER tools through assessment of learner drivers’ hazard perception in real traffic environments
312
T. Falkmer and N.P. Gregersen

Empirical and technical challenges for active driving safety
321
K. Karrer, K. Seifert and T. Karnahl

Accidents and dangerous driving
327

Driving and selective attention: a conceptual framework for understanding the role of selective attention in driving
329
L. Trick and J. Enns

Vision and memory in dangerous driving situations
337
P. Chapman, D. Crundall, N. Phelps and G. Underwood

The road to road rage
346
